Executive Summary

The GlobalTrust Financial Services (GTFS) Business Continuity & Disaster Recovery Plan (BCP/DR) ensures operational resilience for 4,910 employees and customers across Singapore, Dubai, Mumbai, and London. Primary operations run from the Singapore data center with disaster recovery failover to Dubai and cloud recovery via Microsoft Azure Southeast Asia.

- **Operational resilience** — Critical services restored within defined RTO targets.
- **Customer trust** — Customer notification within 2 hours of confirmed major incidents.
- **Financial stability** — Treasury and payment processing prioritised in recovery sequence.
- **Cyber resilience** — Integrated with GTFS-SEC-001 and GTFS-RISK-001.
- **Regulatory compliance** — Regulatory notification within 4 hours where legally required.

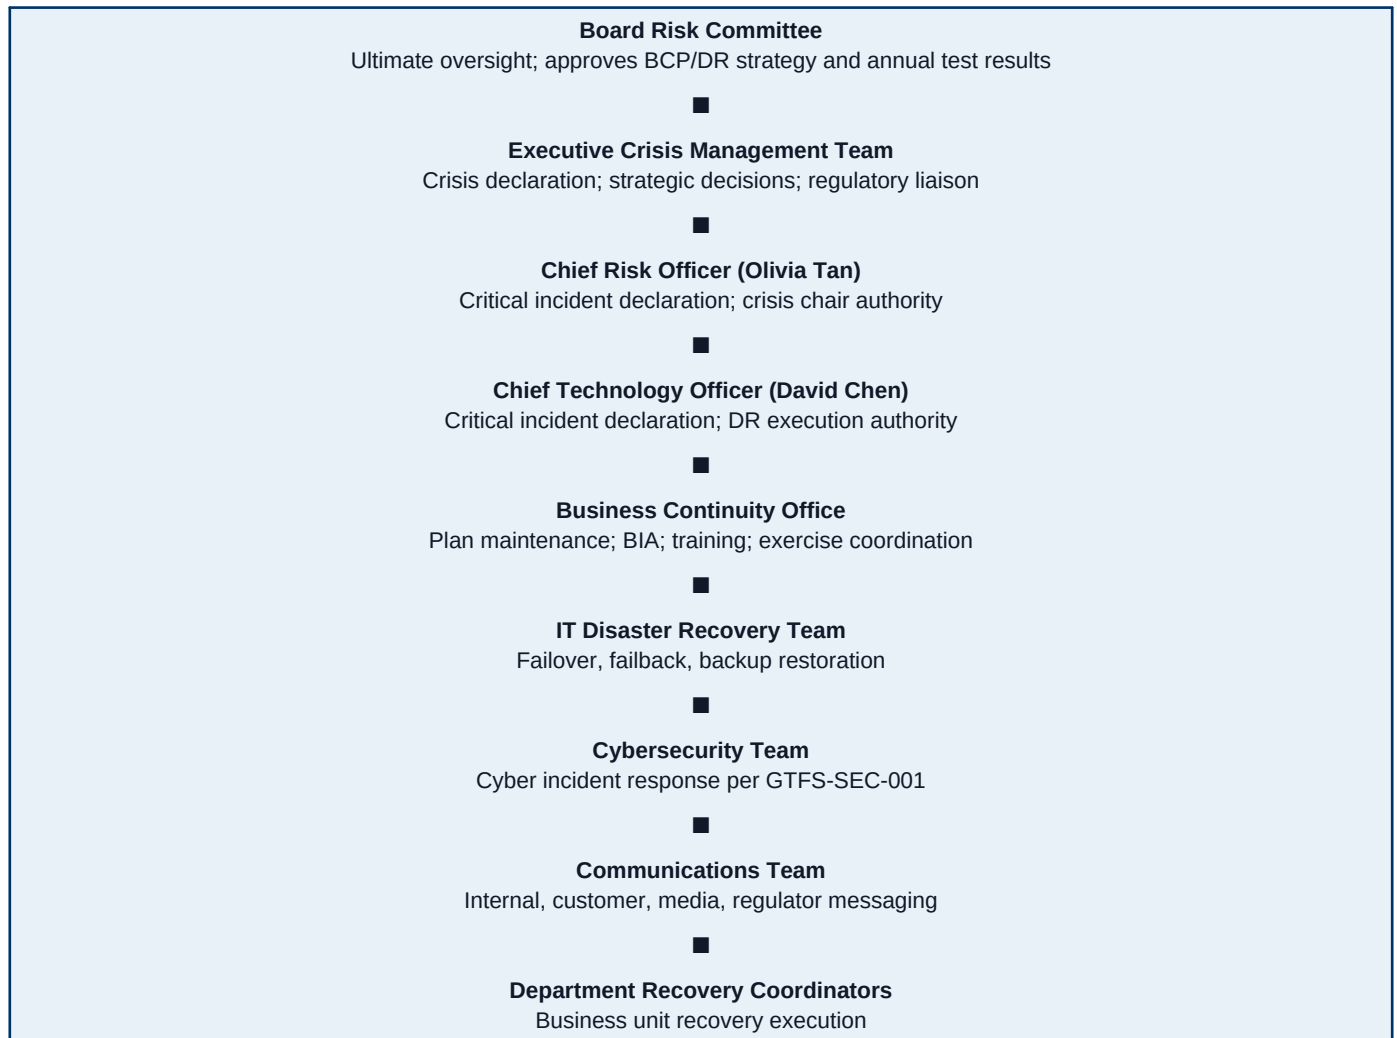

EXECUTIVE NOTE: Critical Incident Declaration authority rests with the Chief Risk Officer or Chief Technology Officer. Maximum Crisis Team assembly time is 30 minutes at the Emergency Operations Center, Singapore Headquarters Level 18.

1. Scope

- All employees, technology, operations, finance, branches, and cloud infrastructure.
- Primary Data Center (Singapore) and Secondary DR Site (Dubai).
- Third-party vendors and critical suppliers per GTFS-PROC-001.
- All critical business services identified in the Business Impact Analysis.

2. Governance Structure

Figure 1 — Incident Command & Governance Structure

BEST PRACTICE: Business Continuity Training is mandatory annually (8 hours) for all employees. Disaster Recovery Plan Review occurs Annually; approved by Board Risk Committee.

3. Business Impact Analysis (BIA)

Critical Service	Priority	RTO	RPO	MTD	Owner
Atlas Core Banking Platform	P1	2 hours	15 minutes	4 hours	IT / Operations
Digital Banking	P1	1 hour	15 minutes	2 hours	Digital Banking
Payment Processing	P1	1 hour	15 minutes	2 hours	Treasury / Ops
ATM Network	P1	2 hours	30 minutes	4 hours	Operations
Retail Banking	P2	4 hours	1 hour	8 hours	Retail
Loan Processing	P2	4 hours	30 minutes	8 hours	Credit Ops (GTFS-OPS-001)
Mortgage Processing	P2	6 hours	1 hour	12 hours	Mortgage (GTFS-OPS-002)
Commercial Banking	P2	4 hours	1 hour	8 hours	Commercial
Project Phoenix AI Knowledge Assistant	P3	8 hours	4 hours	24 hours	Technology
Treasury	P1	2 hours	15 minutes	4 hours	Treasury
Email	P3	8 hours	4 hours	24 hours	IT

Recovery Priority Matrix

Priority	Definition	Recovery Sequence	Examples
P1 — Critical	Customer-facing; regulatory; revenue critical	First	Atlas, Digital Banking, Payments
P2 — Essential	Important business operations	Second	Loans, Mortgages, Commercial
P3 — Important	Supporting services	Third	Email, Phoenix AI, internal tools
P4 — Deferrable	Non-essential during crisis	Last	Training systems, non-critical reports

4. Risk Assessment

Figure 3 — BCP Risk Heat Map (Summary)

Threat	Likelihood	Impact	Risk Rating	Primary Control
Cyberattack / Ransomware	High	Critical	Critical	Cyber IR; immutable backups
Cloud Outage	Medium	High	High	Multi-region Azure; DR site
Data Center Failure	Low	Critical	High	Dubai failover; replication
Payment Gateway Failure	Medium	High	High	Secondary payment switch
Pandemic	Medium	Medium	Medium	Remote work; split teams
Power Failure	Medium	Medium	Medium	UPS; generator; DR site
Vendor Failure	Medium	High	High	Critical vendor validation annually

Risk Category	Examples	Mitigation	GTFS Reference
Natural Disasters	Flood, earthquake, typhoon	DR site Dubai; cloud recovery	This plan
Cyberattacks	Ransomware, DDoS, APT	Cyber IR; immutable backups	GTFS-SEC-001
Pandemic	Infectious disease outbreak	Remote access; GTFS-SEC-003	VPN policies
Power Failure	Grid outage, UPS failure	Generator; DR failover	Facilities
Cloud Outage	Azure region failure	Multi-AZ; secondary region	Cloud DR strategy
Telecommunication Failure	ISP outage, cable cut	Dual carriers; 4G failover	Network team
Data Center Failure	Hardware, cooling, fire	Dubai failover within RTO	DR architecture
Vendor Failure	Critical supplier outage	Critical Vendor Recovery Validation	GTFS-PROC-001
Insider Threat	Malicious employee activity	Access controls; SIEM monitoring	GTFS-SEC-001
Civil Unrest	Protests, security threats	Branch lockdown protocols	Security / Facilities

5. Recovery Objectives

Recovery Time Objective (RTO) is the maximum acceptable downtime. **Recovery Point Objective (RPO)** is the maximum acceptable data loss. **Maximum Tolerable Downtime (MTD)** is the point beyond which recovery may be futile.

Application / Service	RTO	RPO	MTD
Atlas Core Banking Platform	2 hours	15 minutes	4 hours
Digital Banking	1 hour	15 minutes	2 hours
Loan Processing Systems	4 hours	30 minutes	8 hours
Mortgage Processing Systems	6 hours	1 hour	12 hours
Email (Microsoft 365)	8 hours	4 hours	24 hours
Project Phoenix AI Assistant	8 hours	4 hours	24 hours

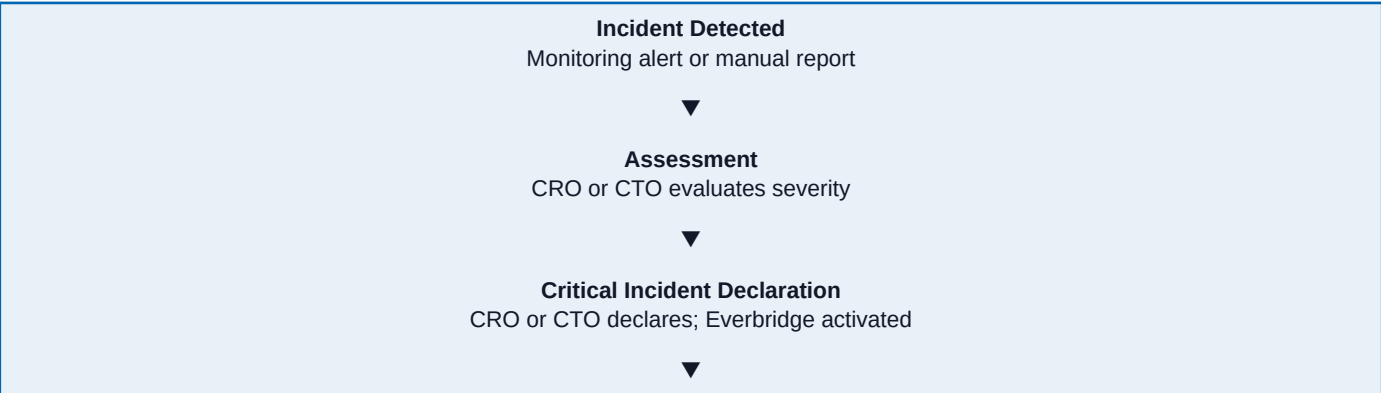

CRITICAL RECOVERY OBJECTIVE: Atlas Core Banking RTO of 2 hours and RPO of 15 minutes are Critical Recovery Objectives approved by the Board Risk Committee.

6. Disaster Recovery Strategy

Figure 2 — Disaster Recovery Architecture

Primary Data Center Singapore	■■■ Replication ■■■	Secondary DR Site Dubai
Atlas Core Banking Digital Banking Payment Processing		Hot standby systems Async replication Failover ready
Cloud Region Microsoft Azure Southeast Asia	Cloud Recovery SaaS & DR workloads	Immutable backups Offline backup vault

Failover Process

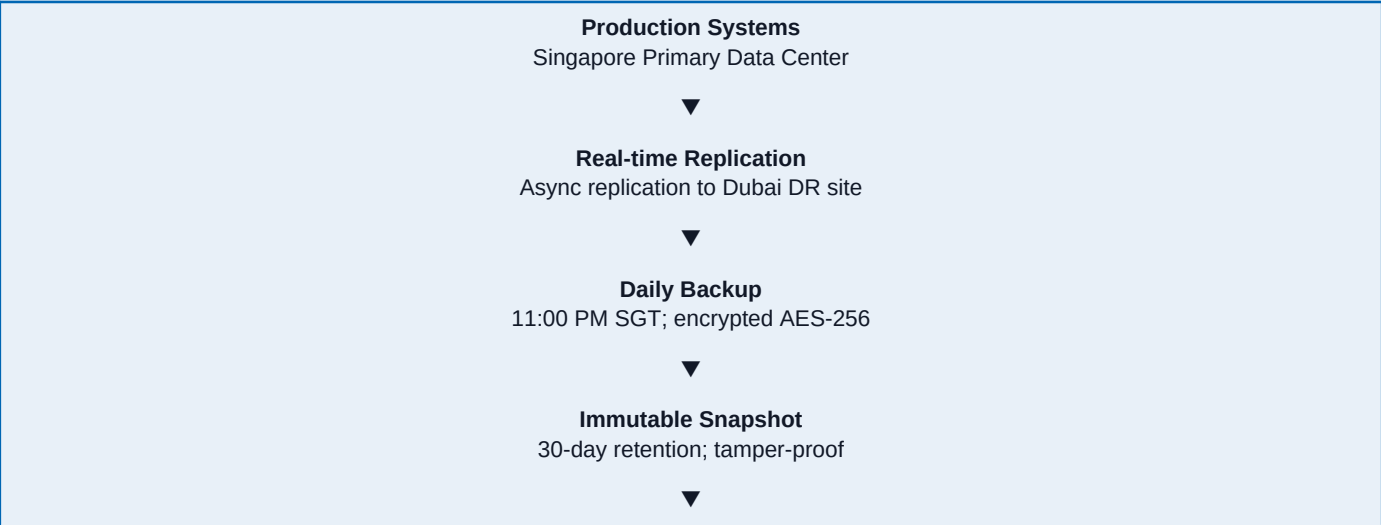

7. Backup Strategy

Backup Type	Schedule	Retention	Encryption	Notes
Daily backups	11:00 PM Singapore Time	90 days	AES-256	Per GTFS-LEGAL-001
Weekly backups	Every Sunday	12 weeks	AES-256	Extended recovery
Monthly backups	First Saturday of every month	12 months	AES-256	Compliance archive
Annual backups	Annually	7 years	AES-256	Regulatory retention
Immutable backups	Daily snapshot	30 days	AES-256	Ransomware protection
Offline backups	Weekly air-gapped copy	90 days	AES-256	Physical isolation
Cloud backups	Continuous to Azure	Per tier	AES-256	Azure Southeast Asia region

Backup Architecture

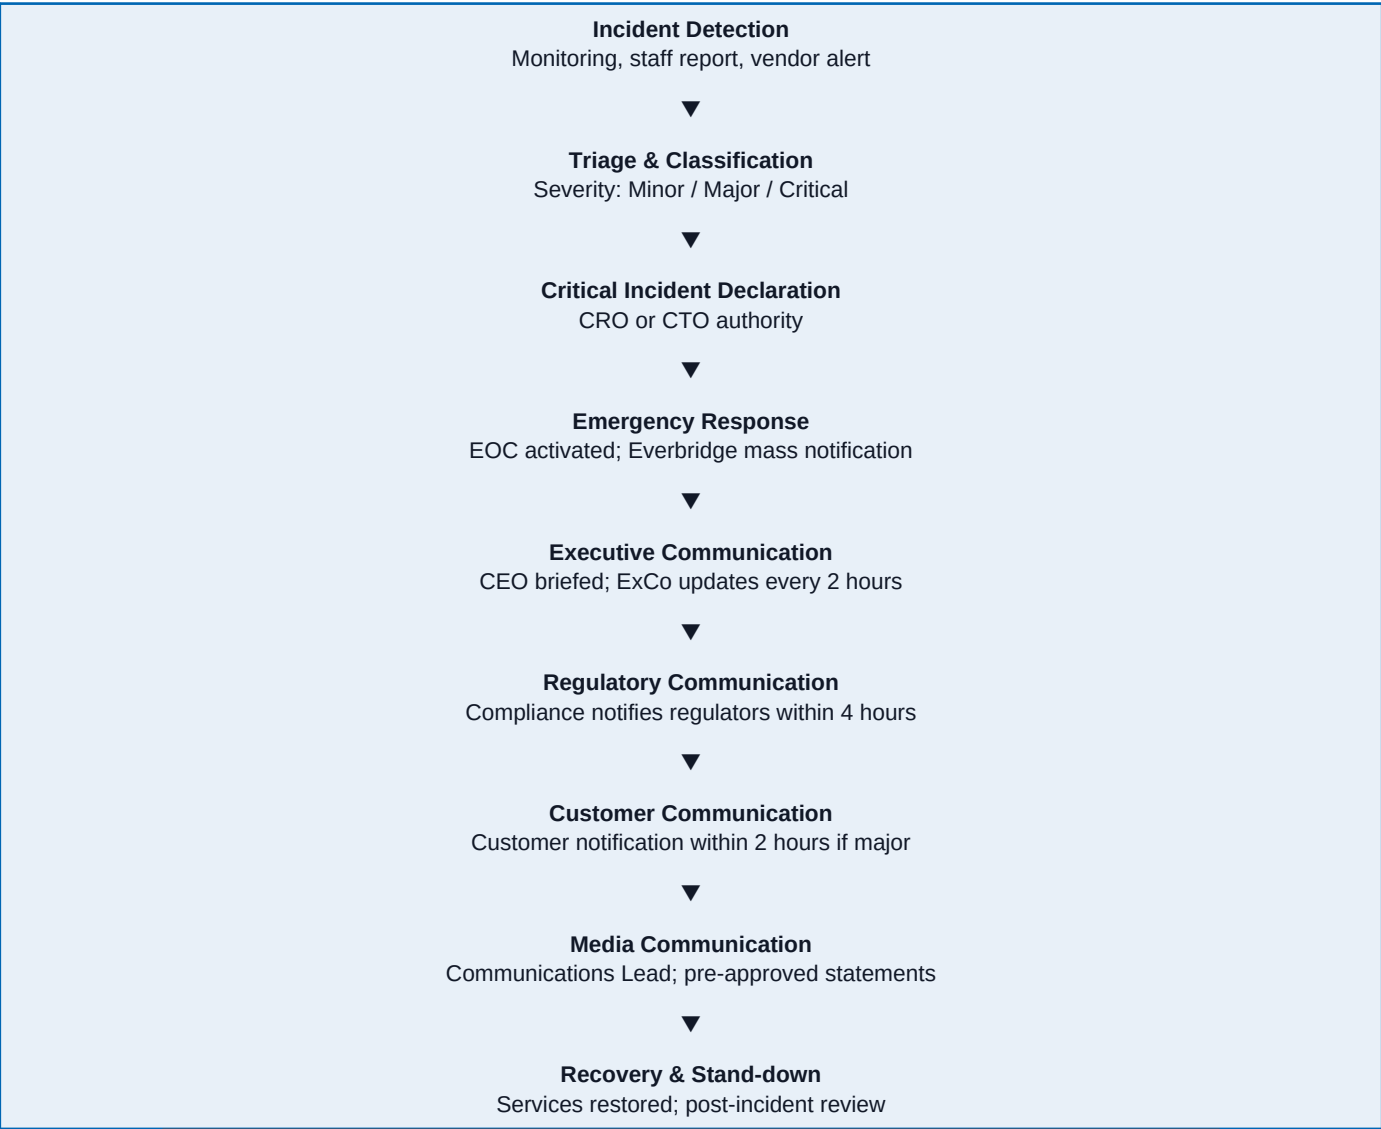

Cloud Backup Vault
Azure Southeast Asia offline vault

Backup Validation
Monthly restore test; quarterly full validation

IMPORTANT: Backup Retention is 90 days for standard backups. Immutable Backup Retention is 30 days. All backups encrypted with AES-256 per GTFS-SEC-001.

8. Crisis Management

Communication Type	Audience	Target Timeline	Owner
Emergency notification	All staff	Immediate (Everbridge)	BC Office
Executive updates	ExCo, Board Risk Committee	Every 2 hours during crisis	CRO
Customer notifications	Affected customers	Within 2 hours (major incident)	Communications
Regulator notifications	MAS, DFSA, RBI, FCA	Within 4 hours where required	Compliance
Media statements	Public / press	As approved by ExCo	Communications Lead

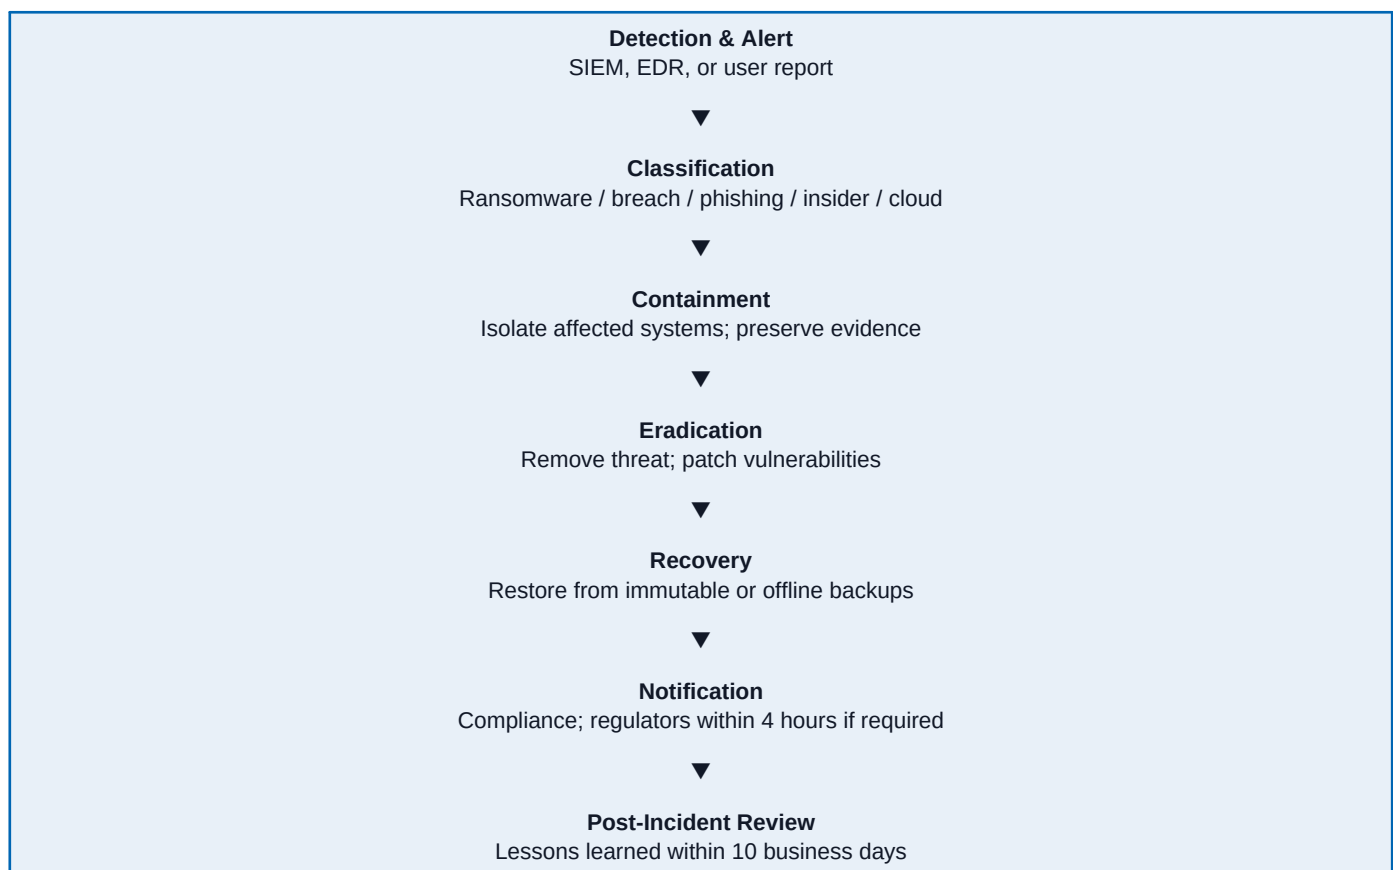

9. Cyber Incident Response

Scenario	Immediate Action	DR Integration	Testing
Ransomware	Isolate systems; activate cyber IR; preserve evidence	Failover if applicable; restore from backups	Cyber Incident Drill twice per year

Scenario	Immediate Action	DR Integration	Testing
Data breach	Contain; forensics; notify Compliance	Assess DR data integrity	Tabletop Quarterly
Phishing campaign	Block domains; reset credentials; user alert	Monitor for lateral movement	Twice per year drill
Insider attack	Revoke access; preserve logs	Validate backup integrity	Annual exercise
Cloud compromise	Isolate Azure resources; rotate keys	Failover to DR site	Full Failover Test Annually
Credential theft	Force MFA reset; session termination	GTFS-SEC-003 VPN review	Quarterly tabletop

OPERATIONAL RISK: Cyber incidents may trigger Critical Incident Declaration simultaneously with GTFS-SEC-001 Information Security Policy procedures.

Cyber Incident Response Workflow

10. Department Recovery Procedures

Department	Critical Functions	Recovery Location	Key Dependencies
IT	Infrastructure, DR execution, monitoring	EOC Level 18 / DR site	Dubai DR; Azure cloud
HR	Employee safety, staffing, payroll continuity	Remote / EOC	HRIS; payroll vendor
Finance	Treasury, payments, reporting	EOC / DR site	Atlas; payment switch
Operations	Branch ops, ATM, customer transactions	Branches / DR	Core banking; ATM network
Customer Service	Call center, complaints (GTFS-OPS-003)	EOC / backup site	CRM; telephony
Compliance	Regulatory reporting, AML (GTFS-COMP-001)	EOC / EOC	Compliance systems
Risk	Risk monitoring, incident reporting	EOC	GTFS-RISK-001 dashboards
Legal	Legal hold, contract continuity	Remote / EOC	Contract repository

11. Vendor Continuity

Vendor Category	Examples	Recovery Validation	Contingency
Cloud Providers	Microsoft Azure Southeast Asia	Annually	Multi-region; DR site
Telecommunications	Primary and secondary ISP	Annually	4G failover; satellite backup
Payment Networks	Visa, Mastercard, local switches	Annually	Secondary payment gateway
Security Vendors	SIEM, endpoint protection	Annually	Offline monitoring capability
Critical Suppliers	Core banking vendor, KYC provider	Critical Vendor Recovery	GTFS-PROC-001, Atlas escalation

Vendor Recovery Matrix

Vendor	Service Criticality	GTFS RTO Dependency	Vendor RTO Commitment	Last Validation
Microsoft Azure	Critical	Digital Banking 1 hour	99.95% SLA	FY2025 annual test
Core banking vendor	Critical	Atlas 2 hours	4 hours	October DR exercise
Primary ISP	Critical	All network services	4 hours	Annually
Payment switch provider	Critical	Payment Processing 1 hour	2 hours	Annually
KYC data provider	High	Onboarding continuity	8 hours	GTFS-PROC-001 review

EXECUTIVE NOTE: Budget for BCP/DR investments is allocated in GTFS-FIN-001 Annual Budget FY2026, including DR site maintenance, Everbridge licensing, and annual exercise costs.

12. Disaster Recovery Testing

Exercise Type	Frequency	Scope	Last Scheduled
Tabletop Exercise	Quarterly	Scenario walkthrough; crisis team	Ongoing programme

Exercise Type	Frequency	Scope	Last Scheduled
Cyber Incident Drill	Twice per year	Ransomware / breach simulation	H1 and H2 annually
Full Failover Test	Annually	Production failover to Dubai DR site	Part of October DR exercise
Backup Restoration Test	Monthly	Random system restore validation	Monthly cycle
Simulation Testing	Annually	Department recovery procedures	October DR exercise
Annual DR Exercise	Every October	Comprehensive multi-scenario test	October each year

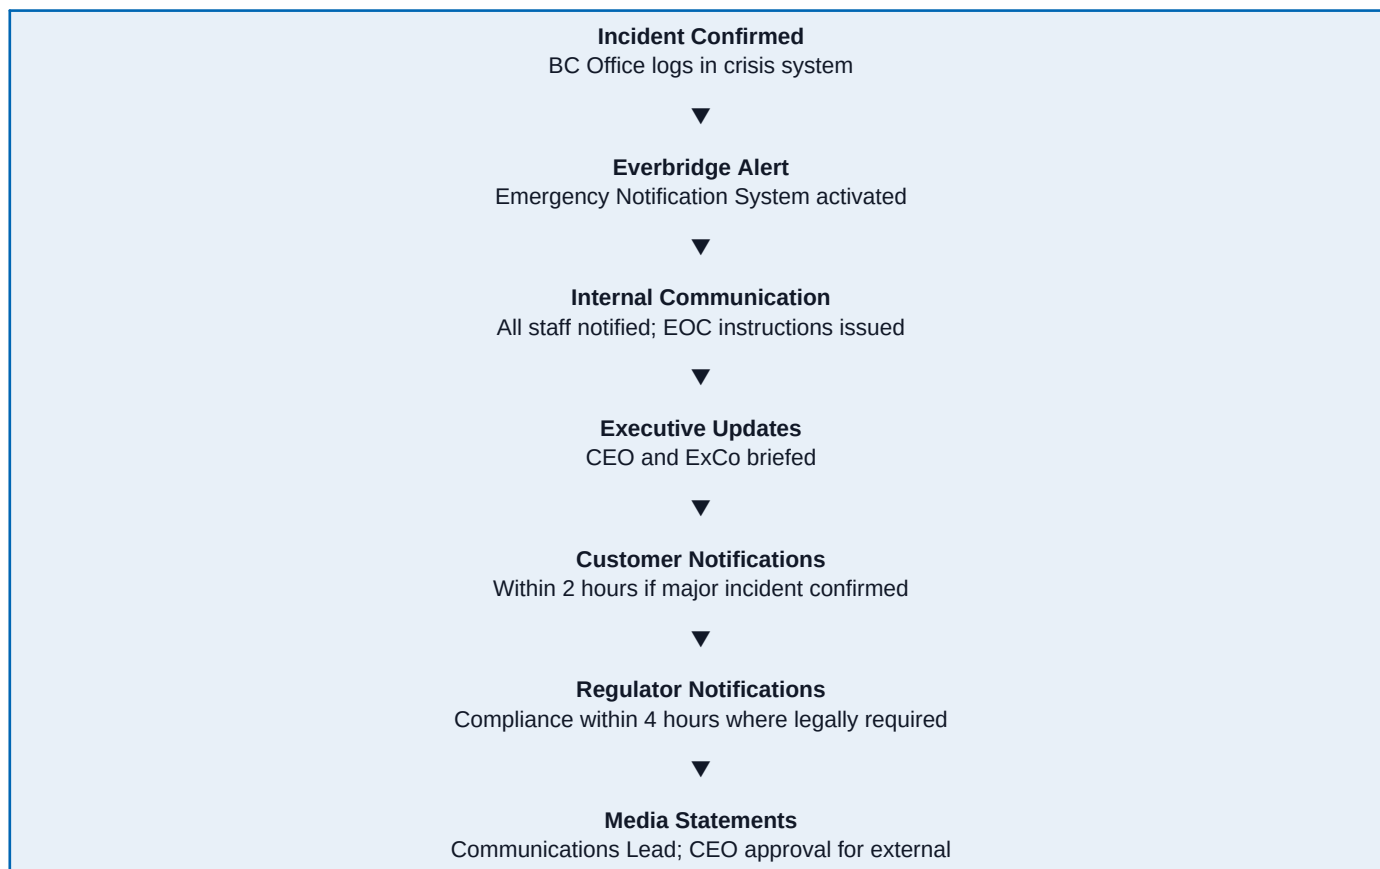

Figure 4 — Major Incident Recovery Timeline (Target)

T+0 Incident declared	T+30 min Crisis team at EOC	T+1 hr Digital Banking RTO	T+2 hr Atlas RTO / Customer notify	T+4 hr Regulatory notify	T+24 hr Post-incident review
---------------------------------	---------------------------------------	---	---	------------------------------------	---

LESSONS LEARNED: Annual DR Exercise in October includes full failover test and Board Risk Committee briefing. Lessons learned documented within 10 business days.

13. Communication Plan

Communication Escalation Flow

Contact	Role	Phone / System
Emergency Hotline	24/7 crisis reporting	+65 8000 9999
Everbridge	Mass notification	Emergency Notification System
EOC	Crisis command center	Singapore HQ Level 18
CRO — Olivia Tan	Critical incident declaration	cro@gtfs.com
CTO — David Chen	Critical incident declaration	cto@gtfs.com
BC Office	Plan coordination	bcp@gtfs.internal

14. Roles & Responsibilities

Role	Responsibilities
Executive Crisis Team	Strategic decisions; regulatory engagement; resource allocation
Business Continuity Manager	Plan activation; BIA maintenance; exercise coordination
Disaster Recovery Manager	Technical failover/failback; backup restoration
Department Heads	Business unit recovery; staff accountability

Role	Responsibilities
IT Recovery Team	System recovery per RTO; infrastructure restoration
Communications Lead	All internal and external messaging
CRO / CTO	Critical Incident Declaration authority

Recovery Teams

Team	Lead	Members	Activation Trigger
Executive Crisis Team	CEO / CRO	ExCo, General Counsel, CFO	Critical incident declaration
IT DR Team	DR Manager	Infrastructure, DBA, Network, Cloud	P1 system outage or failover
Cyber IR Team	CISO	Security ops, forensics, Legal	Cyber incident per GTFS-SEC-001
Communications Team	Communications Lead	PR, Marketing, Customer Experience	Major or critical incident
Business Recovery Team	Department Heads	Department Recovery Coordinators	Department-specific impact
Vendor Coordination	Procurement + IT	Vendor managers	Critical vendor failure

BCP/DR Case Studies

Case Study: Singapore Data Center Failure

Incident: Cooling system failure caused primary data center shutdown in Singapore.

Immediate Actions: CRO declared critical incident; crisis team assembled at EOC Level 18 within 25 minutes.

Recovery Process: Failover to Dubai DR site initiated; Atlas restored within 1 hour 45 minutes.

Business Impact: Digital banking unavailable for 55 minutes; 12,000 customers affected.

Recovery Timeline: Atlas RTO met (2 hours). Full failback completed within 72 hours.

Lessons Learned: Validated Dubai DR readiness; accelerated cooling redundancy upgrade in Singapore.

Case Study: Ransomware Attack

Incident: Ransomware detected on non-production network segment; production isolated preemptively.

Immediate Actions: Cyber IR activated; immutable backups verified (30-day retention intact).

Recovery Process: No failover required; systems restored from clean backups within 4 hours.

Business Impact: Zero customer data loss; RPO of 15 minutes maintained for production systems.

Recovery Timeline: Containment in 2 hours; full recovery in 4 hours.

Lessons Learned: Cyber Incident Drill twice per year validated; immutable backups proved critical.

Case Study: Cloud Region Outage

Incident: Microsoft Azure Southeast Asia experienced 3-hour regional degradation.

Immediate Actions: CTO declared major incident; workloads shifted to secondary Azure region.

Recovery Process: Cloud recovery strategy activated; non-critical workloads deferred.

Business Impact: Digital banking slow but operational; Phoenix AI offline for 2 hours.

Recovery Timeline: Digital Banking RTO of 1 hour exceeded by 1 hour; RCA completed.

Lessons Learned: Multi-region deployment expanded for P1 workloads.

Case Study: Payment Gateway Failure

Incident: Primary payment switch unavailable for 90 minutes during peak hours.

Immediate Actions: Operations activated secondary payment gateway; Treasury notified.

Recovery Process: Failover to backup switch within 45 minutes; transaction queue processed.

Business Impact: 2,400 transactions delayed; zero financial loss; customer complaints per GTFS-OPS-003.

Recovery Timeline: Secondary gateway RTO met; primary restored within 90 minutes.

Lessons Learned: Critical Vendor Recovery Validation confirmed backup switch readiness.

Case Study: Branch Power Outage

Incident: Extended power outage affected 3 Singapore branches for 6 hours.

Immediate Actions: Branch managers activated local continuity plans; customers redirected to digital channels.

Recovery Process: Generator fuel verified at remaining branches; mobile banking promoted.

Business Impact: Minimal transaction impact; 180 in-branch customers served at nearby branches.

Recovery Timeline: Branches reopened next business day; no DR site activation required.

Lessons Learned: Branch-level continuity plans effective for localized incidents.

Case Study: Major Flood

Incident: Flooding affected GTFS Mumbai office; staff unable to access building for 3 days.

Immediate Actions: HR activated pandemic-style remote work; VPN capacity scaled per GTFS-SEC-003.

Recovery Process: Mumbai operations continued remotely; no critical system impact.

Business Impact: Commercial banking SLAs maintained; customer service fully remote.

Recovery Timeline: Full office access restored day 4; zero RTO breach for critical systems.

Lessons Learned: Geographic diversity of DR site (Dubai) and cloud recovery validated.

Case Study: Pandemic Response

Incident: Regional health authority issued work-from-home advisory for Singapore.

Immediate Actions: BC plan pandemic appendix activated; split-team arrangements implemented.

Recovery Process: All P1 and P2 services maintained remotely; EOC on standby.

Business Impact: Customer-facing services uninterrupted; 95% staff remote within 24 hours.

Recovery Timeline: Full operations maintained for 6-week advisory period.

Lessons Learned: Mandatory BCP training (8 hours annually) ensured staff readiness.

15. Frequently Asked Questions

Q: Where is the primary data center?

A: Singapore.

Q: Secondary disaster recovery site?

A: Dubai.

Q: Cloud region for DR?

A: Microsoft Azure Southeast Asia.

Q: Atlas Core Banking RTO?

A: 2 hours.

Q: Digital Banking RTO?

A: 1 hour.

Q: Loan Processing RTO?

A: 4 hours.

Q: Mortgage Processing RTO?

A: 6 hours.

Q: Email RTO?

A: 8 hours.

Q: Atlas RPO?

A: 15 minutes.

Q: Digital Banking RPO?

A: 15 minutes.

Q: Loan systems RPO?

A: 30 minutes.

Q: Email RPO?

A: 4 hours.

Q: Daily backup time?

A: 11:00 PM Singapore Time.

Q: Weekly backup schedule?

A: Every Sunday.

Q: Monthly backup schedule?

A: First Saturday of every month.

Q: Annual DR exercise?

A: Every October.

Q: Tabletop exercise frequency?

A: Quarterly.

Q: Cyber incident drill frequency?

A: Twice per year.

Q: Full failover test frequency?

A: Annually.

Q: Emergency notification system?

A: Everbridge.

Q: Emergency hotline?

A: +65 8000 9999.

Q: Who can declare a critical incident?

A: Chief Risk Officer or Chief Technology Officer.

Q: Crisis team assembly time?

A: Maximum 30 minutes.

Q: Customer notification target?

A: Within 2 hours of confirmed major incident.

Q: Regulatory notification timeline?

A: Within 4 hours where legally required.

Q: Backup encryption?

A: AES-256.

Q: Standard backup retention?

A: 90 days.

Q: Immutable backup retention?

A: 30 days.

Q: DR plan review frequency?

A: Annually.

Q: BCP training requirement?

A: Mandatory annually — 8 hours.

16. Appendices

Appendix A — Business Impact Analysis Summary

Refer to Section 3 for complete BIA with RTO/RPO/MTD for all critical services.

Appendix B — Recovery Priority Matrix

P1 (Critical) → P2 (Essential) → P3 (Important) → P4 (Deferrable). See Section 3.

Appendix C — Emergency Contact List

Contact	Phone / Email	Availability
Emergency Hotline	+65 8000 9999	24/7
Everbridge Support	bcp@gtfs.internal	24/7
EOC — Singapore HQ L18	Internal ext. 9998	During crisis
CRO — Olivia Tan	cro@gtfs.com	24/7 on-call
CTO — David Chen	cto@gtfs.com	24/7 on-call
Compliance (regulatory)	compliance@gtfs.internal	24/7 on-call

Appendix D — Disaster Recovery Checklist

- Critical incident declared by CRO or CTO
- Everbridge mass notification sent
- Crisis team assembled at EOC within 30 minutes
- Failover to Dubai DR initiated if required
- P1 services recovery validated against RTO
- Customer notification within 2 hours (if major)
- Regulatory notification within 4 hours (if required)
- Backup integrity verified (AES-256 encrypted)
- Post-incident review scheduled within 10 business days
- Lessons learned documented and shared

Appendix E — Critical Applications Inventory

Application	Tier	Primary Site	DR Site	RTO
Atlas Core Banking	P1	Singapore	Dubai	2 hours
Digital Banking Platform	P1	Singapore / Azure	Dubai / Azure	1 hour
Payment Switch	P1	Singapore	Dubai	1 hour
Loan Origination System	P2	Singapore	Dubai	4 hours
Mortgage Platform	P2	Singapore	Dubai	6 hours
Project Phoenix AI	P3	Azure Southeast Asia	Azure secondary	8 hours

Appendix F — Vendor Contact Directory (Critical)

Vendor	Service	Emergency Contact
Microsoft Azure	Cloud infrastructure	Azure enterprise support portal
Core banking vendor	Atlas platform	Vendor 24/7 support line
Primary ISP	Telecommunications	Network ops hotline
Payment network	Card processing	Network contingency desk

Appendix G — Glossary

Term	Definition
BCP	Business Continuity Plan — overall organisational resilience framework
DR	Disaster Recovery — IT systems and data restoration
RTO	Recovery Time Objective — maximum acceptable downtime
RPO	Recovery Point Objective — maximum acceptable data loss
MTD	Maximum Tolerable Downtime — longest survivable outage
EOC	Emergency Operations Center — Singapore HQ Level 18
Failover	Switching operations to DR site
Failback	Returning operations to primary site after recovery

Appendix H — Recovery Checklists by Priority

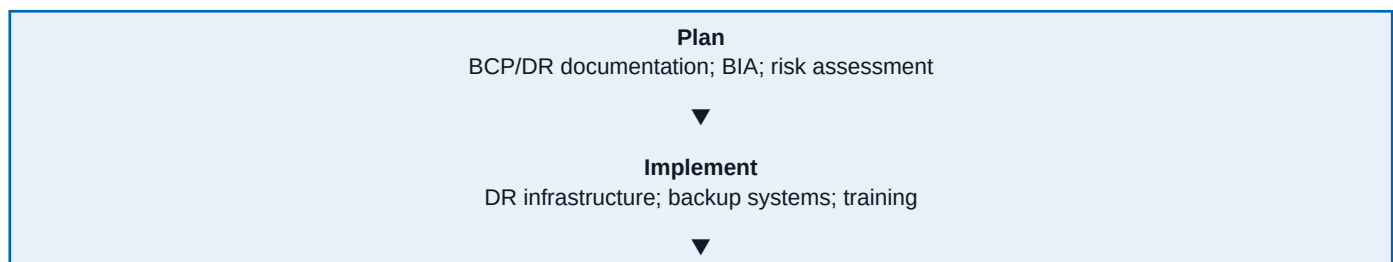

P1 Critical Services Recovery Checklist

- Atlas Core Banking — verify replication lag < 15 minutes RPO
- Digital Banking — confirm Azure secondary region availability
- Payment Processing — activate secondary payment switch if needed
- ATM Network — verify switch connectivity and cash replenishment
- Treasury — confirm market data feeds and settlement systems

P2 Essential Services Recovery Checklist

- Loan Processing — restore per GTFS-OPS-001 continuity procedures
- Mortgage Processing — restore per GTFS-OPS-002 continuity procedures
- Commercial Banking — activate backup relationship management tools
- Customer complaints — activate GTFS-OPS-003 surge procedures

Business Continuity Lifecycle
